

Corporate Overview

NAVIGATE, COLLABORATE, INNOVATE

NCI is a leading provider of enterprise solutions and services to U.S. defense, intelligence, health and civilian government agencies. Informed by over 30 years of experience solving its customers' most important and complex mission challenges, NCI has been at the forefront of operationalizing AI methodologies and numerical algorithms for the U.S. government, particularly in the areas of workforce enablement, digital transformation and advanced analytics. NCI recently launched its [Empower platform™](#), an open-architecture platform to provide secure, containerized access to deploy AI solutions and produce a government workforce that is exponentially more creative and productive. NCI is a mid-tier systems integrator headquartered in Reston, Virginia, and operates at locations across the globe. For more information, visit www.nciinc.com or email contactnci@nciinc.com.

Corporate Overview

CAPABILITIES

Artificial Intelligence

Our *Empower* AI Platform allows your workforce to scale and reach their human potential and let our *Empower* tools and services do the rest. Using best in class AI solutions coupled with our exceptional service offerings, your organization will be more efficient, resulting in increased accuracy and cost savings. Our *Empower* AI Platform™ allows your workforce to scale and reach their human potential and let *Empower* toolkit and services do the rest.

Advanced Analytics

As a leader in mission-oriented intelligence-to-operations initiatives that reduce time and turn data into actionable information, NCI focuses on delivering innovative technologies to solve our customers' complex challenges. We have significantly enriched the intelligence-to-operations lifecycle by applying scalable technologies and advanced algorithms to help interpret data.

IT Infrastructure Optimization and Service Management

NCI delivers enterprise-class, bare-metal virtualization solutions focused on procuring capacity services and Enterprise as a Service (EaaS) requirements in a fiscally-strained environment. Our unique, tailored methodology for delivering IT service management is based on defining needs rather than simply implementing industry best practices.

Engineering and Logistics

NCI delivers innovative engineering and logistics solutions enabling affordability, effectiveness and mission readiness anywhere in the world. Our solutions ensure the customer the lowest cost for the best performance anywhere, any time.

Cybersecurity and Information Assurance

Our comprehensive approach aligns information assurance and cybersecurity initiatives that support business objectives, compliance requirements and risk management. We provide our federal government customers full lifecycle of cybersecurity services and are actively engaged in ensuring their networks are properly secured.

Health and Program Integrity

Our health IT solutions enable efficient information sharing, reduce paperwork collection and control efforts, and improve healthcare quality for our government customers. And, we help U.S. federal agencies reduce improper payments by fighting fraud, waste and abuse in entitlement programs.

Agile Development and Lean Software O&M

NCI develops applications and modernizes systems using proprietary Agile methodology. We provision and scale data for high performance, processing and analytics, data strategy and analysis, and at-scale data/software engineering automation. And, we bring efficiency and visibility to application Operations and Maintenance (O&M) using our CK method and teams. Our approach has proven to increase break-fix throughput and reduce lead time and support costs.
